## WECON SYSTEMS

## WELCOME

To the first edition of What's Happening at Wecon Systems "WHAWS" newsletter for the year 2025. The first day of winter (aka the winter solstice) marking the shortest day and longest night of the year in the northern hemisphere has come and gone. If you are like most of us, we are looking forward to the extended periods of sunlight in each passing day. Although snow was in the air here in southern Ontario, the "early" winter season did provide us with the "white" Christmas so many of us wished for. This was followed with a fluctuating bout of varying weather conditions. One day warm and wet, then the next day cold with the risk of flurries. Notwithstanding the changing weather conditions and due to where the holidays fell this year many of us were provided with a longer than usual break to catch up with family and friends during this normally busy Christmas season.

Due to year end commitments several of our employees maintained a busy schedule up to Christmas and through the New Year's break. We thank them for their efforts. These efforts were noticeably appreciated by our customers who were able to minimize down time during this particularly demanding time of the year. By the time you are reading this the kids have returned to school and most of are back to our regular routines. We hope you had a great Christmas break and wish everyone a healthy and prosperous New Year. We look forward to beginning another successful year.

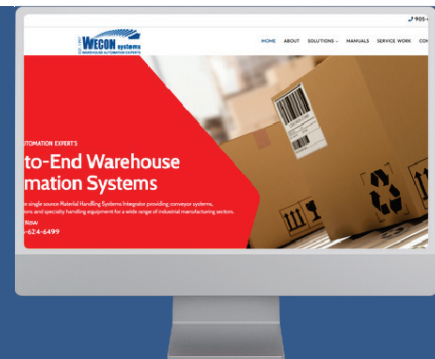

## Our Annual Christmas Celebration

This year's celebration took place at Peter's on Eglinton in Mississauga. They provide a welcoming environment and a dining experience that specializes in smoked meat sandwiches and souvlaki in addition to offering a variety of alternate choices to satisfy most appetites. The ambiance is congenial and inviting, providing patrons with surroundings that are both charming and appealing. The serving staff were more than accommodating.

We invite you to explore our website and discover how we can serve you better. Your support and feedback are invaluable to us as we continue to improve. Stay connected with us for the latest updates, promotions, and news. Thank you for being part of our journey. We're excited to embark on this new chapter with you!

## ONGOING & COMPLETED PROJECTS

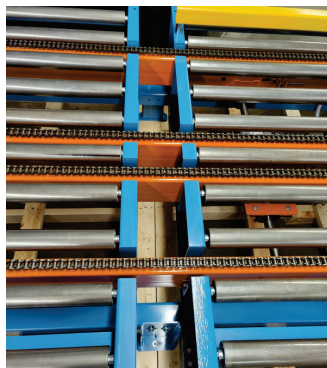

We have completed the installation of replacing belted spirals in support of a highly recognized Canadian retailer's distribution center. Wecon was contracted to supply and install at their facility, since the original equipment was dated, we had some challenges replacing the spirals with identical units, but that didn't stop our installation team from completing on site modifications to suit the new equipment.

A popular sports apparel company has just ordered a warehouse storage unit. Storganizer is a high-density warehouse storage system that converts poorly utilized warehouse space into a clever slim foot print storage solution. they have found that these units drastically reduce the time it takes to store and pick products.

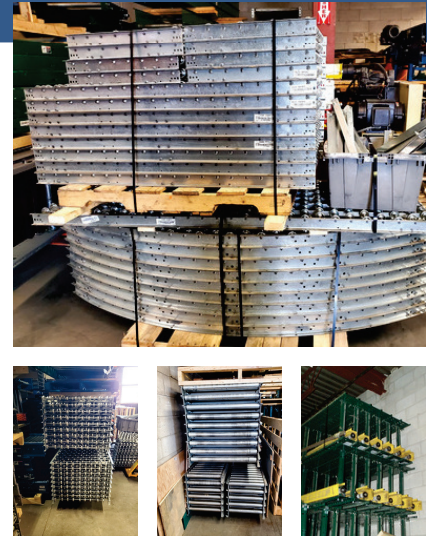

A well-known integrator has reordered some pallet conveyors and transfers (CDLR) as their business is expanding, it is great to see our customers growing again.

## ONGOING & COMPLETED PROJECTS

We have a significant amount of used 24" nominal width line shaft conveyors and 18" wide nominal width 1.9" gravity conveyors in our used equipment inventory. This used equipment is refurbished providing the customer with a comparable product at significant cost savings over the purchase of new equipment. Contact any of our sales professionals for details regarding availability of equipment types and sizes.

Scheduled / preventative maintenance continues to be an integral portion of our scope of work. We have several customers who realize the benefit of our WECARE service to prevent down time and have contracted us to complete this function as part of a regular routine.

Our sales staff and distributors remain busy quoting and continue to pursue new business opportunities. They are always available to assist and answer any customer inquiry. They can be reached at Wecon Systems by calling (905) 624-6499 or alternately they can be contacted via e-mail at:
