WELCOME

to the summer edition of What's Happening At Wecon Systems "WHAWS" newsletter for 2024. The heat is on, the rain is falling, holiday season is in full swing, yep it's Summertime! The nice long days are already getting slightly shorter and back to school is only weeks away. It won't be long before we miss this time of year so make sure you enjoy as much as you can.

We remain grateful to our customers for your continued belief and support in our team to make your material handling requirements a reality. To our partners and suppliers; we know that the struggle is ongoing with supply chain issues and delays. Your continued communications and transparency with our team have allowed Wecon to schedule projects accordingly providing realistic deadlines and real time updates to our customers.

You can continue to check on our web page www.weconsystems.com to keep updated on how we are navigating the current situations in our industry today.

ONGOING & COMPLETED PROJECTS

- We have recently been given certification as authorized installers for AutoStore and have already been involved in a couple of projects here in the GTA
- A well known Pallet client has reordered some pallet conveyor as their business is expanding, it is great to see our customers growing again
- A new last mile delivery service is setting up a new facility here in Mississauga and has just ordered almost 1500 feet of new conveyor to get started, we will be installing for them very shortly so they can get started doing what they do best.
- We are progressing well on a very large mechanical installation contract in Quebec, we expect to be wrapping this project up in the coming months
- A popular sports apparel company has just ordered more powered flexible conveyors, they have found that these units drastically reduce the time it takes to off load incoming loads
- Our demo unit has been approved by a automotive parts distribution center, we were able to do an FAT at our facility and we have now received the go ahead for 8 more cells
- Our Dorner line of low profile conveyor is very active, these are great for tight areas and don't forget we have a sanitary line as well, great for food, beverage or pharmaceutical
- Our 3PL customers continue to be very active and are always growing sometimes taking advantage of our extensive inventory of previously loved conveyor equipment
- A Canadian retail giant is now moving forward with replacing some of their almost 30 year old equipment, we were able to source drop in units to make the implementation as painless as possible

- Our WeCare program is really taking off, scheduled maintenance is paying off for multiple customers cutting down on breakdowns and improving production
- We have now been awarded the mechanical installation of a large pallet handling system in Western Canada, this will kick off later this year and will not be complete until 2025

- Phase two of a pallet handling system is being manufactured and is scheduled for delivery in the coming weeks, our integrator partner will be testing and then off to the US it goes
- Our maintenance teams continue to be very active promoting our WECARE program with more and more customers recognizing the value of keeping their equipment in good working order. For direct contact feel free to contact Bob Norcross directly at bnorcross@weconsystems.com

If you have any conveyor or material handling inquiries, please give any of our experienced and qualified installation, service or sales staff a call. They will be happy to assist and help answer any of your questions. No matter the size or nature of the project you may be considering, our specialists will ensure all phases of the job are covered. They can be reached at Wecon Systems by calling (905) 624-6499 or alternately via email through: info@weconsystems.com , service@weconsystems.com or sales@weconsystems.com.

CAREER OPPORTUNITIES

Due to the continued demand for warehouse automation, we continue looking for career-driven individuals to join our team in a Project Management, Sales Representative or Technician role. We also invite hard-working individuals, preferably with Millwright experience, to join our Mechanical Conveyor Installer department. If you know of anyone who may be interested in a career in any of these disciplines, especially with an interest in automation and robotics, please have them contact us to discuss any of these opportunities. Our team of professionals generates "Guaranteed Results".
